

Saving money is often easier said than done. Setting clear goals can motivate you to take action, focus on what's important and steer clear of overspending. Tracking your progress is an effective way to stay on top of your savings goals. Use these thermometers to set **short-** (new shoes, board game), **medium-** (computer, vacation) and **long-** (car, house) **term goals**. Share your goals with someone. Accountability is key!
